

Microsoft Dynamics NAV 5.0 Becomes Two Releases

Microsoft Dynamics™ NAV 5.0 becomes Microsoft Dynamics NAV 5.0 and Microsoft Dynamics NAV 5.1.

Microsoft Dynamics NAV 5.0 ships in March 2007

Microsoft Dynamics NAV 5.1 ships in Q4 CY2007.

Microsoft Dynamics 5.0 will ship with the C/SIDE client, all the new application features, Microsoft Office 2007 integration, and a technical preview of Microsoft Dynamics NAV 5.1.

Microsoft Dynamics NAV 5.1 will ship with the new client, 3-tier architecture and web services

What you need to know

No change in scope

The technology and application scope of the final product will not be affected by this decision. Microsoft Dynamics NAV 5.0 and Microsoft Dynamics NAV 5.1 will complete the delivery of Microsoft Dynamics Wave 1 release innovations and move the product closer to the innovations planned in Wave 2.

Partners and customers get more time – better quality

The reason we are doing this is to ensure the quality and reliability of the final product as this allows us more time to test and stabilize the product with the new Role-based client. All partners will have even more time to learn and become familiar with the new application features before moving to the new Role-based client and technology platform.
